Biography

Mustafa Sabil, a junior doctor in the Nothern-Eastern region of the United Kingdom, is an aspiring radiologist. With a keen interest in Radiology, during his Paediatric rotation of Foundation Training, he took it upon himself to do something Paediatric-Radiology related and researched the comparison of international UTI imaging guidelines in children, A N.I.C.E Brexit. With a strong desire to apply for Radiology specialty training in the coming application year, Dr Sabil is keen become renounced for Radiology related publications and research. This particular piece has a unique political-BREXIT related spin to it, in the midst of the political drama occurring at the present.
