

# BIOPOLYMERS AND BIOPLASTICS

---

Liliana Rubio  
PMO Polymer Business Intelligence, Brazil

Abstract: This paper discusses the importance of biopolymers and bioplastics in the current market, highlighting the need for sustainable and eco-friendly materials. It explores the various applications of these materials in different industries, such as packaging, agriculture, and healthcare. The paper also discusses the challenges and opportunities associated with the development and production of biopolymers and bioplastics.
