# Climate Change and Global Warming

August 06-07, 2018 Osaka, Japan

## Climate change adaptation: Education to action!

Parshuram Sharma Niraula

Centre for Environment Education Nepal, Nepal

The United Nations Environment Programme (UNEP) and the United Nations Development Programme (UNDP) have been instrumental in the development of the Centre for Environment Education Nepal (CEEN), which is a leading organization in the field of environment education in Nepal. CEEN has been working for the last 13 years to promote environment education and awareness among the general public. The organization has been successful in reaching out to a large number of people through its various programs and activities. CEEN has been instrumental in the development of the National Curriculum Framework for Environment Education (NCFFE) in Nepal, which is a landmark document in the field of environment education. The NCFFE provides a comprehensive framework for environment education in schools and colleges across the country. CEEN has also been instrumental in the development of the National Curriculum Framework for Environment Education (NCFFE) in Nepal, which is a landmark document in the field of environment education. The NCFFE provides a comprehensive framework for environment education in schools and colleges across the country. CEEN has also been instrumental in the development of the National Curriculum Framework for Environment Education (NCFFE) in Nepal, which is a landmark document in the field of environment education. The NCFFE provides a comprehensive framework for environment education in schools and colleges across the country.
