

**Is single OM15 sufficient for screening of mid-facial fracture in the emergency setting of Ysbyty Gwynedd?**

Dr. [Name] is a [Title] at [Institution]. This study was conducted at [Location] and aims to evaluate the effectiveness of a single OM15 X-ray in identifying mid-facial fractures in an emergency department setting. The study involves a retrospective analysis of [Number] patients who presented with suspected mid-facial fractures. The primary outcome is the sensitivity and specificity of the OM15 X-ray compared to a standard CT scan. The results will be presented at the 2<sup>nd</sup> World Congress on Medical Imaging and Clinical Research in Paris, France, on September 11-12, 2017.
