Adolescents: A preliminary study

Hikari Namatamé, Hiroko Fujisatô and Yoko Sawamiyá

¹University of Tsukuba, Japan

²National Center of Neurology and Psychiatry, Japan

It is an important issue worldwide that the mental health of children and adolescents. It is very important for children to learn adaptive emotion regulation strategies because the emotion dysregulation is risk factor for depression and anxiety disorders. However, in Japan, there is no scale that assesses the emotion regulation of children, so that the research progress of depression.
