

Ahmed glaucoma valve (AGV), tube insertion technique (graft sparing) and management of rare complications in AGV surgeries

Irshad Ahamed Subhan
King Abdulla Medical City, Saudi Arabia

Introduction & Aim : The purpose of this 5 surgical videos presentation is to demonstrate a new technique of tube insertion in AGV implantations and also provide audience with rare situations of AGV surgeries and managing complications. The presentation package has 2 videos showing AGV insertion techniques involving only needles. It gives an easy route for the tube as the scleral tunnel is designed using only needles. Hence the difficulty in pushing the tube from the large tunnel created by crescent blade (Gdih technique) into the 23G tunnel is totally avoided. There is no need to have a crescent blade and graft to cover the tube. The presentation has videos of the following surgeries.

Keywords : Subhan's scleral tunnel technique.
