Correlational analysis between emotional intelligence and adjustment problems during Covid-19

Shikha Verma Chhatrapati Shahu Ji

Maharaj University, India

Ever since **Coronavirus** shook the world, there has been a reported increase in anxiety and fears related to uncertainty. The present study examined the relationship between emotional intelligence (EI) and adjustment problems (AP) during the time of **Covid-19**. A total of 105 (Male 47 and Female 58) participants, age ranging between 18-55 years, participated in the online **questionnaire**.
