Percentile growth charts for symmetric and asymmetric small for gestational age infants

and

Post Graduate Institute of Medical Education and Research, India

Age and sex specific percentile growth charts for body weight and crown-heel length (CHL) of full-term 100 symmetric small for gestational age (SGA) (boys: 50, girls: 50), 100 asymmetric SGA (boys: 50, girls: 50) and 100 appropriate for gestational age (AGA) (boys: 50, girls: 50) infants representing upper socioeconomic strata have been presented. Ponderal Index (PI) was used to categorize SGA babies into symmetric SGA ($PI \geq 2.2 \text{ g/cm}^3$) and asymmetric SGA ($PI < 2.2 \text{ g/cm}^3$). Body weight and CHL of the babies were measured at birth, 1, 3, 6, 9 and 12
