The conference will provide a platform for the exchange of information and ideas, and will promote international cooperation in the field of Agriculture & Horticulture.

Bozena Bogucka, since 2002, she has worked as a doctor of agricultural science at the University of Warmia and Mazury in Olsztyn (Poland, Europe). Her scientific activity has been concentrated on research related to the impact of macro- and microelements on quantitative and qualitative characteristics of potato for the food and processing industry for over 14 years. She has published over 30 works in this field. Her area of interest also includes root food plants storing

impact of macroelements and microelements on the size of starch granules in potatoes".
