Introduction

The Journal of Paediatric Medicine & Surgery is a peer-reviewed journal that provides a platform for the publication of original research, clinical reports, and reviews in the field of paediatric medicine and surgery. The journal covers a wide range of topics, including the diagnosis, management, and prevention of various paediatric conditions. The journal is published quarterly and is available online through the journal's website.

The journal is a multidisciplinary journal that covers a wide range of topics in paediatric medicine and surgery. The journal is published quarterly and is available online through the journal's website. The journal is a peer-reviewed journal that provides a platform for the publication of original research, clinical reports, and reviews in the field of paediatric medicine and surgery. The journal covers a wide range of topics, including the diagnosis, management, and prevention of various paediatric conditions.

For example: Celiac disease

Celiac disease is a chronic autoimmune disorder that affects the small intestine. It is caused by a reaction to gluten, a protein found in wheat, barley, and rye. The reaction causes damage to the lining of the small intestine, which can lead to malabsorption of nutrients and a variety of symptoms, including abdominal pain, diarrhea, and weight loss. The diagnosis of celiac disease is typically made through a combination of blood tests and a biopsy of the small intestine. Treatment involves a strict, lifelong gluten-free diet.
