

Continuing and Emerging Concerns about Contaminants

Ramakrishnan B*

Division of Microbiology, Indian Agricultural Research Institute, New Delhi, India

Many chemical and microbial constituents that are present in soil and water ecosystems are getting recognized as contaminants and the evaluation of their potential threat to the environmental health.

in wastewater led to adverse effects on the local fish, resulting in the domination by females and about 18 to 22 percent of fish exhibiting intersex [13]. High incidence of intersex in the male smallmouth bass
