

Signs and symptoms of ectopic gestation include increased abdominal distension, tenderness, peritonism and hypotension.

Rupture of an ectopic gestation can lead to symptoms similar as abdominal distension, tenderness, peritonism and hypotension with upright posturing, in order to drop intrapelvic blood in low, which can lead to swelling of the abdominal depression and beget fresh pain.

Acknowledgement

I would like to thank my Professor for his support and encouragement.

Conflict of Interest

The authors declare that they are no conflict of interest.
