### Feed utilization

Survival rate (SR) =  $\frac{N_2 - N_1}{N_1} \times 100$

### Data analysis

ANOVA was used to determine the effect of soaked pigeon peas on the growth performance and feed utilization of Nile tilapia fingerlings. The data were analyzed using the following equation:

### Results

The proximate composition of the Nile tilapia fingerlings is shown in Table 1. The proximate composition of the Nile tilapia fingerlings is shown in Table 1.

### Proximate composition

The proximate composition of the Nile tilapia fingerlings is shown in Table 1. The proximate composition of the Nile tilapia fingerlings is shown in Table 1.

### Growth performance and feed utilization

The growth performance and feed utilization of Nile tilapia fingerlings are shown in Table 2. The growth performance and feed utilization of Nile tilapia fingerlings are shown in Table 2.

### Discussion

### Proximate compositions

### Growth performance and feed utilization
