

The global renewable energy market was valued at \$928.0 Billion in 2017, and is expected to reach \$1,512.3 Billion by 2025, registering a CAGR of 6.1% from 2018 to 2025. Renewable energy technologies convert the energy from different natural sources such as sun, tides, wind and others, into its usable forms such as electricity. Energy 2020 focuses on bringing together renewable and non-renewable energy experts, policy makers, economists, academicians and students to discuss the current state of research and development in energy strategies. Today's market is fragmented as hydro and sea control, wind vitality, sun powered vitality, bioenergy, and geothermal vitality. By end client, it is grouped into private, business, and mechanical and others.

By analysing the importance of Renewable & Non-Renewable Energy, Meetings International is organizing 19th International Conference on Renewable & Non-Renewable Energy (Energy 2021) during April 20-21, 2020 in
