?YmkcfXg. COVID-19; Children; Pathophysiology; SARS-CoV-2

## Description

It was soon exposed that a novel coronavirus was responsible. The novel coronavirus was named as the severe acute respiratory syndrome coronavirus-2 (SARS-CoV-2, 2019-nCoV) due to its high homology (~80%) to SARS-CoV, which caused acute respiratory distress syndrome (ARDS) and high mortality during 2002-2003 [1].
