

# An Overview on Holistic Drug

**Ashok Kumar Panda\***

*Department of Ayurveda Drug Development, National Institute of Ayurveda Drug Development, India*

Holistic health is a means of measuring our current state of health that takes into account the whole person in mind, body, and spirit. Through reciprocal and indispensable healthcare practices that blend with western drug, a holistic health approach to healthcare enables us to support our health from the perspective of our whole body system, versus treating one symptom at a time

Holistic health or holistic mending is frequently defined as a form of mending that looks at the whole person body, mind, and spirit [1]. This kind of holistic mending frequently involves multiple complimentary drugs and indispensable healthcare practices that can lap with ultramodern- day western drug, but will go beyond the singular treatment of symptoms to support further than just the body.

Some indispensable healthcare practices that frequently are plant within the realm of holistic health are

- Chiropractic
- Herbalism
- massage
- Energy work (reiki)
- remedy
- Yoga/ contemplation
- Acupuncture
- Physical remedy
- General western drug
- Nutrition
- Particular training

Holistic drug is a form of mending that considers the whole person-- body, mind, spirit, and feelings-- in the hunt for optimal health and heartiness [2]. According to the holistic drug gospel, one can achieve optimal health-- the primary thing of holistic drug practice-- by gaining proper balance in life.

Holistic drug interpreters believe that the whole person is made up of interdependent corridor and if one part isn't working duly [3], the other entire corridor will be affected. In this way, if people have imbalances (physical, emotional, or spiritual) in their lives, it can negatively affect their overall health.

A holistic doctor may use all forms of health care, from conventional drug to indispensable curatives, to treat a case. For illustration [4], when a person suffering from migraine headaches pays a visit to a holistic doctor, rather of walking out solely with specifics, the doctor
