

How Is Lung Cancer Diagnosed and Treated

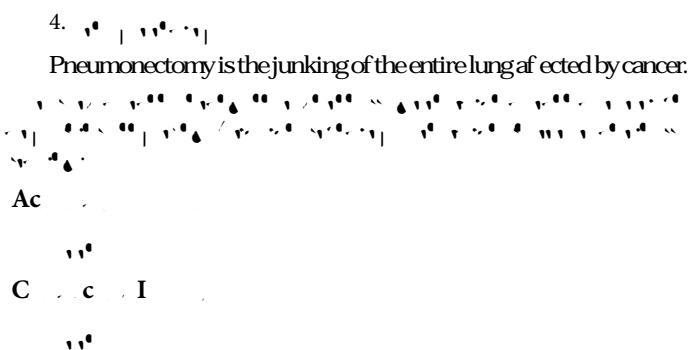

Onur Ozturk*

Department of Family Medicine Samsun, Universities of Turkey, Asarcik Meydan Family Health Center, Turkey

Purpose

Lung cancer is the leading cause of cancer death in both men and women. The most common type of lung cancer is non-small cell lung cancer (NSCLC). The most common type of NSCLC is adenocarcinoma. Adenocarcinoma is a type of cancer that starts in the glandular cells of the lung. Adenocarcinoma is the most common type of lung cancer, accounting for about 40% of all lung cancer cases. Adenocarcinoma is a type of cancer that starts in the glandular cells of the lung. Adenocarcinoma is the most common type of lung cancer, accounting for about 40% of all lung cancer cases.
